

**AMENDMENTS TO THE CLAIMS**

1. (Original) An e-mail sending and receiving system for sending and receiving e-mail between communication terminals, where each e-mail message is written on a Web page provided by a communication center, and each communication terminal is provided in a mobile or fixed station, the system comprising:

a mail generating section for generating an e-mail message to be sent to an addressee;  
a positional data storage section for storing a plurality of positional data; and  
a positional data attaching section for attaching one or more of the positional data stored in the positional data storage section to the e-mail message generated by the mail generating section.

2. (Original) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data storage section includes a plurality of positional data registered by an addresser.

3. (Original) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data storage section includes a plurality of positional data registered by the communication center.

4. (Original) An e-mail sending and receiving system as claimed in claim 1, wherein the mail generating section generates each e-mail message by using a format suitable for the

communication terminal of the addressee, so that the communication terminal can read the e-mail message.

5. (Original) An e-mail sending and receiving system as claimed in claim 1, further comprising:

a detailed data generating section for generating detailed data relating to each positional data attached to the e-mail message, and attaching a URL for accessing the detailed data to the e-mail message.

6. (Original) An e-mail sending and receiving system as claimed in claim 5, further comprising:

a positional data register section for storing the detailed data in the positional data storage section according to a request from the communication terminal of the addressee.

7. (New) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data includes at least one of a name, a coordinate, an address, a phone number, a postal code, and additional data for explaining a relevant place.

8. (New) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data is positional data on a map.
